I. INTRODUCTION AND OVERVIEW

This document provides the 1994 general reexamination of the Borough of Medford Lakes Master Plan and development regulations. The Planning Board is required to prepare and adopt by resolution the findings of such reexamination, as provided by the governing body.

In 1982, Medford Lakes revised its Master Plan following guidelines set forth in the Municipal Land Use Law and by the New Jersey Pinelands Commission. In 1988, Medford Lakes adopted its "1988 Master Plan Update". This document addressed goals, objectives, and recommendations involving environmental protection, historic preservation, traffic circulation, housing, population and future land use. To provide continuity with the Borough's previous Master Plan documents and to be consistent with the guidelines set forth in the Municipal Land Use Law, this 1994 Master Plan Reexamination Report addresses the following topics:

1. The major problems and objectives relating to land development in the Borough of Medford Lakes at the time of the adoption of the 1988 Master Plan Update are described and discussed.

2. The extent to which problems and objectives stated in the 1988 Master Plan update have been reduced or have increased in the period from 1988 to 1994.
3. The extent to which there have been significant changes in the assumptions, policies and objectives which formed the basis of the Borough's Master Plan and development regulations, with particular regard to the density, distribution of population and land uses, housing conditions, circulation, conservation of natural resources, energy conservation, collection, disposition and recycling of designated recyclable materials, and changes in state, county and municipal policies and objectives.
4. The specific changes recommended for the Borough's Master Plan or development regulations, including underlying objectives, policies and standards, or whether a new plan or regulations should be prepared.

The 1994 Borough of Medford Lakes Master Plan Reexamination is intended to reflect a continuation of balanced land use, fiscal responsibility, preservation of natural resources and maintenance of our infrastructure improvements.

II. 1988 REEXAMINATION REPORT: BOROUGH GOALS, OBJECTIVES, PROBLEMS AND RECOMMENDATIONS

The 1988 Master Plan Update initially stated the major problem identified in the 1982 Medford Lakes Master Plan as "the maintaining and preserving of open space". The 1988 update further states in recognition of a need to maintain open space and to ensure conformance with The Pinelands Comprehensive Management Plan, a revised zoning ordinance, site plan ordinance and land subdivision ordinance had been adopted. These ordinances included new regulations for the Borough's Lakes Suburban Reserve (LSR) zone. This action was effectively aimed at maintaining and preserving open space by requiring a minimum lot size of 3.2 acres for approximately 10% of the Borough's land area.

The 1988 update also referenced the 1982 Master Plan as having recognized the unique character provided by the log structures in the Borough. The Borough subsequently adopted a historic district zone and historic design standards as an action to preserve and protect the Borough's unique character.

The 1988 document states that no major changes have occurred in the Borough since the last adoption of the 1982 Master Plan; however, area communities have grown at dramatic rates and have increased traffic passing through the Borough along Tabernacle, Stokes and Tuckerton Roads. The 1988 document further references the 1982 Master Plan as having deemed unwarranted revisions to the Borough's road system, recreation facilities and housing requirements. The 1982 Medford Lakes Master Plan, however, recommended adherence to the comprehensive management plan of The Pinelands Commission to aid the Borough in its endeavor to maintain the current level of housing and services offered. Medford Lakes subsequently adopted a Land Development Ordinance supporting The Pinelands Comprehensive Management Plan.

- **Specific Goals and Objectives of the 1988 Master Plan Update**

1. Protect the environmental quality of the Borough's natural resources in order to preserve the balance of its ecological systems and safeguard the future health and welfare of the residents. The stated objectives in support of this goal were as follows:
 - a. Encourage preservation of ecological systems and recognition of the environmentally sensitive nature of lands and waters in the Borough.
 - b. Maintain design standards which will minimize the effects of development upon the environment in all areas of the Borough.

2. To safeguard the heritage of the Borough of Medford Lakes and maintain the uniquely livable environment by preserving that part of the Borough which reflects elements of its cultural, social, economic and architectural history. Objectives:
 - a. Ensure that any renovation of or additions to existing structures are performed in accordance with clearly established design standards for the preservation of historic features.
 - b. Evaluate standards to maintain historic properties and recommend additional standards where appropriate.
 3. To seek a coordinated circulation system within a local and regional planning context which enables the safe and efficient movement of people and goods. Objectives:
 - a. Encourage alternate circulation networks to be devised around the Borough to minimize auto traffic trips through the Borough.
 - b. Evaluate county and state transportation and circulation planning and to coordinate with local circulation planning.

1988 Planning Board members identified areas of concern for incorporation into the 1988 Master Plan Update. These areas of concern were as follows:

1. The Borough recycling program should be included.
2. Sewage disposal hook-up for septs to be made mandatory by law.
3. The public should be made more aware of the harm caused by fertilizers as they enter the water system. Laws are to be considered.

4. There must be incorporation of the historic district in the Master Plan.
5. Census data.
6. Tree preservation.
7. Control of water fowl which affect lake waters.
8. Update to the rural development zone.
9. Demographics
10. Traffic problems.
11. Colony Club activities regarding lake cleaning.
12. Colony Club procedures to maintain the lakes.
13. Affordable housing.

The 1988 Master Plan Update included the following recommendations in response to the Planning Board's concerns and other planning issues.

- **Environmental Protection**

1. **Tree Preservation.** Sample tree preservation ordinances were included in the Master Plan Update as an outline for an ordinance to preserve trees on residential properties in the Borough of Medford Lakes.

2. **Solid Waste/Recycling.** The Borough's existing recycling ordinance establishes a program for the separation of waste and paper products, glass, aluminum, metal, garbage, trash and debris and other metal and non-metal items. The Borough ordinance also includes separation and collection of leaves. It was recommended in the 1988 Master Plan Update to include a recycling ordinance within the Land Development Ordinance. It was further recommended in conformance with state recycling objectives, that development regulations regarding the recycling should be reviewed at least every 36 months. It was further recommended that site plan and subdivision reviews address where materials will be stored, where materials will be picked up, how much material will be generated, and how much storage area is required for each material.
3. **Sewage Disposal Hookups/Septic Hookups.** It was recommended that the Borough require units sewerred by septic systems to tie into the public sewer system once infrastructure is available.
4. **Fertilizers.** The 1988 Master Plan Update provided suggestions for managing fertilizer use on lawns around the lakes. These suggestions included requesting applicants seeking development and redevelopment approval to provide deed restrictions prohibiting the use of fertilizers. Another solution suggested was to educate residents regarding best management practices. Several BMP's were listed.
5. **Water Fowl.** It was stated that water fowl pose a nuisance to the homeowners in the Borough in terms of recreation and aesthetics. Best management practices and public education regarding the water fowl problem was suggested in addition to a municipal ordinance as (then) recently adopted by the Borough. A series of BMP's were listed.

6. **Lakes.** The 1988 Master Plan Update included a detailed history and discussion of the goals, objectives and implementation program included in the Colony Club Lakes Master Plan. The Lakes Master Plan included recommendations for management and control measures. Management and control measures which included silt chambers/sediment traps, grass waterways along roadsides, and street sweeping should be implemented through the Borough. Additional recommendations included a regular program for the maintenance of catch basins and silt traps, and that best management practices by the Borough residents be encourage. Several BMP's were listed. The Master Plan Update also recommended that the responsibility for the dams in the Borough be clearly established, and that a program be implemented ensuring regular inspection of dams and necessary maintenance.

- **Historic Preservation**

The 1988 Master Plan Update stated that in recognition of the need to preserve and protect the log cabins along with the Borough's uniquely liveable environment, a Medford Lakes historic study and preservation plan was completed. In August, 1986 an addendum to the 1982 Master Plan was adopted establishing a Lakes Historic District. To implement and enforce the Lakes Historic Zone, an ordinance was adopted establishing a Lakes Historic and Preservation Commission. It was recommended that the Historic Commission continue to administer and review applications within the Lakes Historic District based upon existing design standards with continued administration by the Borough's Planning Board.

- **Traffic Circulation**

The 1988 Master Plan Update stated that communities neighboring the Borough have rapidly developed since the last adoption of the Master Plan, with

increased traffic being the result. Also mentioned was the fact that Medford Lakes is a community where walking and bicycling are important modes of transportation. The Borough had established a school courtesy route designating 18 roads for children to use for bicycling to and from school and recreation sites.

It was recommended that the Borough seek cooperation with Burlington County in designating an alignment for a Medford Lakes By-Pass. It was further recommended that the Planning Board, in cooperation with the Borough Council, seek out the county for discussion regarding concerns about traffic passing through the Borough and its negative affect on the quality of life and the hazards it creates.

- **Housing**

A Housing Element was prepared by the Medford Lakes Borough Council, adopted on August 1, 1988 and made part of the 1988 Master Plan Update. As stated, the Housing Element concludes that "the Borough is unable to provide any type of housing or plan for housing and believes its allotment should be zero".

- **Population**

The 1988 Master Plan Update provided a general population profile for the Borough of Medford Lakes based on the 1980 U.S. Census. A detailed population and housing profile of the Borough is attached as Appendix A.

- **Future Land Use Recommendations**

The 1988 Reexamination Report included the following future land use recommendations:

1. To maintain the character and pattern of land use in the Borough, it is recommended that land uses and bulk requirements for the Lakes Residential (LR) district remain as established by the last master plan.
2. Because Medford Lakes is located at the edge of a growing regional center which provides convenient opportunities for employment and services to Borough residents, and in character with the residential land use character of the Borough, it is recommended there be no expansion of the Lakes Commercial (LC) district in the Borough.
3. The Borough has no plans for expansion of municipal land uses, therefore, there is no need for expansion of the Lakes Institutional (LI) district.
4. It is recommended that the primary land use in the Lakes Environmental Conservation District (LEC) be recreation with single family detached dwellings limited to conditional uses at one unit per 2.06 acres as permitted.
5. No changes to the Lakes Quasi-Public District (LQP) are needed and no expansion of the district is necessary.
6. It is recommended that the Lakes Suburban Reserve District (LSR) remain unchanged.

● **Land Use Compatibility with Adjacent Municipality**

The 1988 Reexamination Report included an examination of existing and proposed land uses within the Borough as compared to the adjacent existing and proposed land uses in Medford Township. General compatibility between the land

uses was found, with the exception of Medford Pines. It was stated that the density of units proposed for the RGD District in Medford Pines is not compatible with the land use and environmental concerns in Medford Lakes and should be discouraged by the Borough.

III. 1988 TO 1994: CHANGES TO GOALS, OBJECTIVES, ASSUMPTIONS, POLICIES AND PROBLEMS

This section describes the extent to which problems and objectives stated in the 1988 Master Plan update have been reduced or have increased. In addition, significant changes in the assumptions, policies, and objectives which formed the basis of Medford Lakes Master Plan and development regulations are also described.

1. Environmental Quality

The Borough of Medford Lakes continues its goal of protecting the environmental quality of the Borough's natural resources. The Borough Council, Planning and Zoning Boards, Environmental Commission, Historic Preservation Commission, Recycling Coordinator and Department of Public Works have strived together toward this goal by preserving ecological systems and recognizing environmentally sensitive lands through their decisions and actions.

The threat to our natural resources has intensified since 1988 as land use impacts have grown. Two factors have helped control the rate and level of impact since 1988. One factor involves actions by the surrounding municipality, Medford Township. Medford has made significant efforts in controlling land use impacts to shared natural resources through implementation and enforcement of municipal land use codes and practices. Secondly, the rate of area development growth

has slowed since the 1980's. Medford Lakes welcomes both of these results. Design standards which effect land use impacts have been strengthened through updates to the Borough's development regulations. Medford Lakes intends to continue this practice.

2. Historic Preservation

The Borough's goal of safeguarding the heritage of Medford Lakes and preserving its cultural, social, economic and architectural history remains constant. The Planning Board has maintained its standards and historical perspective in its review of Historic District applications. Applications are also reviewed by the Lakes Historic and Preservation Commission in accordance with the municipal ordinance. It is intended that this procedure be continued.

The 1988 Master Plan update stated an objective to evaluate standards to maintain historic properties and recommend additional standards where appropriate. Standards have been examined by Council, Planning Board and Zoning Board, although no specific additional standards have been recommended for adoption.

3. Circulation

The Borough's goal of seeking a coordinated circulation system within a local and regional planning context remains constant. Medford Lakes seeks the safe and efficient movement of people and goods.

The Borough has stated objectives to encourage alternate circulation networks around Medford Lakes to minimize auto traffic to the Borough. Furthermore, the Borough seeks to coordinate with local circulation planning and to evaluate county and state transportation and circulation planning.

The Borough of Medford Lakes through its Police Department and Department of Safety regularly coordinate and interact with county and state agencies regarding local circulation planning and safety. At present, Burlington County is proposing improvements along Route 541 (Stokes Road) in the vicinity between Tabernacle Road and Minnetonka Trail. The Planning Board and Police Department have submitted input with regard to these improvements to the Burlington County Planning Board and intend to continue involvement.

The municipal objective to encourage alternate circulation networks around Medford Lakes "to minimize auto traffic to the Borough" has become more specific since 1988. In view of present concerns of maintaining viable commercial businesses and encouraging a marketing plan for Medford Lakes, the Borough seeks a balance between strengthening its present commercial businesses and controlling traffic. This balance applies to the previous Master Plan update recommendation that cooperation be sought with Burlington County in designating an alignment for a Medford Lakes by-pass.

4. Recommendations adopted in the 1988 Master Plan Update

A series of recommendations were adopted in the 1988 update in response to concerns of the Planning Board. Continuation of, or changes to these recommendations in this 1994 Reexamination Report are described as follows:

- a. **The Borough supports preservation of viable trees on residential properties. Methods include supplying educational materials to residents and by ordinance.**
- b. **The Borough's recommendation to address recycling during subdivision and site plan review is being implemented. Medford Lakes continues its support of maintaining its present recycling efforts, and expansion of the program where appropriate.**
- c. **The Borough supports requiring units sewered by septic systems to tie into the public sewer system once infrastructure is available.**
- d. **Medford Lakes supports the controlled use of fertilizer on lawns around lakes, and the education of residents about the impact of fertilizers on our lakes system.**
- e. **Medford Lakes supports the use of best management practices and municipal ordinances as methods to control excessive water fowl.**
- f. **The Borough supports the use of best management practices in controlling impacts to its lakes system. The responsibility for the dams remains a concern. A program for regular inspection of the dams and necessary maintenance is high priority.**
- g. **The conclusion of the Borough of Medford Lakes Housing Element is that the Borough is unable to provide any type of housing or plan for (affordable) housing and believes its allotment should be zero. This conclusion remains true in 1994 as it did in 1988 when it was adopted by Council.**

- h. The 1988 Master Plan recommended no expansion of the Lakes Commercial (LC) district. Now in 1994, the Borough places an increased focus on strengthening its commercial tax base and ensuring business viability. Many options exist in achieving this objective, and no one option is to be ruled out prior to a more detailed examination of marketability in Medford Lakes.**

IV. 1994 REEXAMINATION REPORT: NEW RECOMMENDATIONS

In this section, the Borough of Medford Lakes Planning Board specifies additional recommendations, goals and objectives of the Master Plan, and supplements those described in Section III.

1. Municipal Revenue

Municipal revenue must be sufficient to promote the public health, safety, morals and general welfare of the residents of Medford Lakes.

- a. An economically healthy tax base must be maintained within a land use context which is restricted from expansion to any significant degree.**
- b. A cohesive plan for businesses in Medford Lakes is necessary in order to stay competitive regionally. It is recommended that marketing strategies be developed for Medford Lakes. A committee should be formed consisting of municipal officials, business owners within the Borough, and municipal residents.**

- c. Home Businesses are regulated within the Borough by Ordinance, and these ordinances are to be enforced. Regulated home businesses should be inventoried, and made part of the Borough's marketing plan. Appropriate licensing fees should be set.**
- d. Assessments are to be equitable and accurate for all properties. Single family homes with apartments should be assessed appropriately.**
- e. Vacant or non-commercial properties within the Lakes Commercial Zone which have potential for becoming commercial ratables should be examined. Appropriate properties adjacent to the LC zone should be studied for possible inclusion within the commercial district.**
- f. Bed and breakfast type uses should be examined as a possible conditional use activity within appropriate zoning districts.**
- g. The balance between encouraging business expansion, and controlling traffic and parking must be considered in any marketing strategy.**
- h. Updated Pinelands Commission regulations relative to commercial uses should be examined for marketing opportunities in Medford Lakes.**
- i. All proposed developments are to provide for the needs and impacts of the development. When determined necessary by the Borough using fair and reasonable standards, applicants will be required to make on-site and off-tract improvements, or pay the**

proportionate or pro-rata amount of the cost of providing the necessary facilities, improvements and services. Examples of possible needs and impacts of the development include drainage, water and sewer, recreation, traffic circulation, streets and parking, community facilities, open space and environmental conservation.

2. Population and Housing

Borough services are to be provided to residents in view of changing municipal demographics. The special needs of the elderly are to be considered, as are the special needs of our youth.

- a. The changing needs of our more senior residents and the evolving educational needs of our students are to be considered in borough policies and municipal expenditures.
- b. The Borough of Medford Lakes recommends no changes to its development regulations specific to redevelopment plans for the Borough, as described in the "Local Redevelopment and Housing Law", P.L. 1992, c.79.

3. Environmental Quality

Supplementing the goals and objectives of the Borough's Master Plan regarding environmental quality, the following recommendations are made:

- a. The Lakes are recognized as a high priority resource within the Borough. Lake quality, dam maintenance, and the use of surrounding land contribute significantly to municipal property values and the Borough tax base. The Borough must develop

strategies which support lake quality and dam maintenance. The use of fish in helping to maintain water quality, reduce plant growth and mosquitos should be explored.

- b. The Borough supports the expanded use of indigenous plants in all municipal and private landscaping, and the need to monitor the effectiveness of the municipal tree cutting ordinance. Erosion control projects should include the use of bio-engineering techniques as appropriate.
- c. Excessive fertilizer use is recognized as a real danger to water quality in our lakes and streams, groundwater and aquifers. The effects include degradation of water quality which can impact humans and wildlife. Medford Lakes supports the strict control of excessive fertilizer use on all properties throughout the Borough. Furthermore, surrounding municipalities are requested to pursue control of excessive fertilizer use which may effect our shared natural resources.
- d. Appropriate buffer widths and plantings should be provided between differing land uses and along the municipal boundary. General land use compatibility between Medford Lakes and Medford Township continues.
- e. The Borough of Medford Lakes actively supports environmental education. All segments of the population need to be given opportunities to learn methods and techniques which will permit future generations to enjoy environmental benefits as we currently enjoy. Municipal strategies should be developed to expose environmental education to all population segments within the Borough. Recommended strategies are provided in Appendix B.

4. Traffic

Traffic remains a problem within the Lakes Commercial District. Drive-through traffic contributes congestion in our central business area

without contributing to local businesses. Furthermore, there is inadequate parking for our present businesses and churches, and excessive speed along certain Borough streets. Recommendations:

- a. All site plan applications require close attention to the parking requirements.**
- b. A Medford Lakes By-Pass option for drive-through traffic remains necessary. The Borough supports further study of this concept by Burlington County, and continued coordination with Borough officials and the Police Department.**
- c. Methods to implement recommendations by the Medford Lakes Police Department on how to reduce traffic congestion and improve inadequate parking conditions should be studied.**
- d. Traffic should be directed along non-dam routes in an effort to reduce impacts on load bearing culverts and bridges.**

5. Development Regulations

Development regulations include the zoning ordinance, subdivision ordinance, site plan ordinance and other regulations which effect the use and development of land. Certain Borough development regulations require evaluation for possible updating.

Recommendations:

- a. Permitted and conditional land use should be examined in view of changes to Pinelands Commission regulations, and changing needs and demographics in Medford Lakes.**
- b. The general regulations of the Borough should be evaluated for possible updating in view of changing needs and demographics in Medford Lakes.**
- c. Subdivision and site plan regulations should be evaluated for consistency with the latest amendments to the New Jersey Municipal Land Use Law.**
- d. Municipal Design Standards should be evaluated for consistency with modern design techniques. Updating should be provided as necessary in view of the general developed nature of the Borough and the second generation of development which will occur.**

APPENDIX B

ENVIRONMENTAL EDUCATION FOR MEDFORD LAKES: RECOMMENDED STRATEGIES

The Borough of Medford Lakes supports initiatives to help increase the individual's understanding of, and involvement with the environment. Medford Lakes has within its boundaries various parks, forests, lakes and other natural resources. Since the early 1900's, outdoor science, nature study, conservation education, camps, and volunteer projects have existed throughout the region. Today, environmental issues and activities are a part of community life in Medford Lakes.

In the pursuit of developing the knowledge, attitudes, skills, and behaviors needed to maintain, protect, and improve our natural resources, Medford Lakes recommends a series of strategies. The plan involves families and individuals, schools, county and municipal governments, business and industry, and organizations and groups. Environmental education continues from childhood through retirement and is acquired at home and through formal education, daily activities, and direct experiences with nature. Medford Lakes recommends the following strategies for establishing environmental education as a lifelong process:

a. At Home

- Conduct and encourage such daily activities as recycling, composting, pollution prevention, and ridesharing.
- Share involvement with one's family by exploring forests, open spaces, parks, and water resources. Attend environmental events and community activities together.
- Use products that reflect environmental responsibility.
- Encourage proper insulation and weather stripping of homes to cut down on energy use.

b. In School

- **Integrate environmental education experiences throughout the curriculum and in all school-related activities. Involve students in acquiring environmental knowledge, values, and skills through participation in positive learning activities such as seminars, field activities, and community projects.**
- **Implement environmental policies and procedures throughout the school to practice what is being taught.**
- **Expand and refine teacher knowledge of environmental concepts, values, and behaviors by providing environmental education topics as part of teacher workshops and in-service programs. Acquire materials and equipment supporting environmental education.**

c. Municipal and County

- **Support the continued education of government officials and staff regarding environmental principles and related issues.**
- **Create, maintain, and support environmental education opportunities in public parks, forests, and open spaces. Encourage the use of local and county public lands for study and enjoyment by classes and groups.**

- **Communicate environmental initiatives by networking through the local media, libraries, school groups, and individuals.**
- **Incorporate the use of methods and materials that reflect environmental responsibility.**
- **Strive to maximize the proper use and enjoyment of natural resources by the public.**
- **Initiate community projects that protect and improve natural resources in the Borough.**

d. Businesses and Industries

- **Continue the great strides which businesses and industries have taken to achieve compliance with environmental regulations.**
- **Strengthen and support the movement to decrease the use of non-renewable resources and the production of hazardous and solid waste.**
- **Continue to develop new and alternative products that lessen impacts on natural resources.**
- **Support the consumer movement to utilize products that reflect environmental responsibility.**

e. **Organizations and Groups**

- **Promote and provide environmental education information and programs to the public.**
- **Encourage staff and members to participate in environmental education workshops and seminars.**
- **Re-evaluate the charter relative to practicing environmental responsibility.**
- **Encourage the proper use and enjoyment of natural resources.**
- **Support and encourage community projects and activities that maintain, protect and improve our environment.**

Environmental education is a continuing process which impacts one's activities from childhood through retirement. The Borough of Medford Lakes promotes the empowerment of its residents to better understand and value our natural resources, and to assume environmental responsibility.
